

MOHIT KURHADE

FULL-STACK DEVELOPER | JAVA DEVELOPER

Pune, Maharashtra, India | +91 95617 65337 | mohitkurhade21@gmail.com
linkedin.com/in/mohit-kurhade-7b283a292 | github.com/goat-89

PROFESSIONAL SUMMARY

Final-year Computer Engineering student with hands-on full-stack development experience across Java Spring Boot backends and React frontends. Built a real-time emergency communication platform with WebSocket and Docker, and a multi-role recruitment platform with Supabase, PostgreSQL, and secure payments. Strong in OOP, REST API design, SQL, responsive UI development, and automated testing. Seeking entry-level Full-Stack, Java, or Software Developer roles.

TECHNICAL SKILLS

Programming: Java, JavaScript, Python, SQL, HTML5, CSS3

Backend: Spring Boot, REST API Design, WebSocket, FastAPI, JSON, CORS, Authentication, Microservices

Frontend: React, Vite, Tailwind CSS, Responsive Web Design, Form Validation, UI Components

Databases and Cloud: PostgreSQL, SQL, Supabase, Row Level Security, Edge Functions, Cloud Computing, DBMS

Tools: Git, GitHub, Docker, Maven, Postman, Automated Testing, OOP, Data Structures and Algorithms

PROJECTS

CrisisMesh — Resilient Emergency Communication Platform | Java, Spring Boot, REST APIs, WebSocket, SQL, Docker

- Architected a Spring Boot backend with incident, alert, responder-coordination, and role-based channel workflows delivering real-time status updates over WebSocket under unreliable network conditions.
- Implemented offline message queuing, retry handling with exponential backoff, and delivery tracking to improve reliability; containerized services with Docker and Maven builds for consistent deployment.

InternNext Pro — Internship and Recruitment Platform | React, Vite, Supabase, PostgreSQL, Tailwind CSS | [GitHub](#)

- Built a responsive React + Tailwind CSS frontend and Supabase/PostgreSQL backend supporting 3 user roles across 10+ workflows: listings, applications, shortlisting, search, filters, and notifications.
- Enforced security with Supabase Auth, Row Level Security, and server-side Razorpay payment verification; added form validation and automated tests to safeguard critical user flows.

Mini Gemini — Generative AI REST API | Python, FastAPI, Google Gemini API, Pydantic | [GitHub](#)

- Developed a FastAPI service integrating the Google Gemini LLM API with validated request schemas, CORS middleware, and environment-based key management for secure, structured JSON responses.

Face Detection System — Computer Vision Application | Python, OpenCV, Image Processing

- Created a real-time OpenCV face-detection pipeline rendering bounding-box visualizations on live video at 25+ FPS, validated across 100+ images with varied lighting and angles.

INTERNSHIP EXPERIENCE

CodSoft — Java Developer Intern | Nov 2025 – Dec 2025

- Developed 5+ Java applications applying OOP principles, reusable class design, input validation, and exception-aware logic; tested boundary cases and debugged runtime behavior for correctness.

Cognifyz Technologies — Web Developer Intern | Mar 2025 – Apr 2025

- Delivered responsive HTML, CSS, and JavaScript interfaces with interactive components and reusable styling; ensured cross-browser and cross-device consistency through systematic debugging.

EDUCATION

Bachelor of Engineering (B.E.), Computer Engineering | 2027

Savitribai Phule Pune University — Indira College of Engineering and Management, Pune, Maharashtra

Relevant Coursework: Data Structures and Algorithms, DBMS, Operating Systems, Computer Networks, Cloud Computing, Artificial Intelligence

CERTIFICATIONS

- Alpha (DSA with Java) — Apna College
- Get Started with API Gateway — Google Cloud Skill Badge
- Spectrum of AI
- Learn Ethical Hacking From Scratch — Udemy (15 hours)
